'Catastrophic Care' In America's Health System : NPR

About Catastrophic Care. In 2007 David Goldhill's father died from infections acquired in a well-regarded New York hospital. The bill, for several hundred thousand dollars, was paid by Medicare. Angered, Goldhill became determined to understand how it was possible that well-trained personnel equipped with world-class technologies could be responsible for such inexcusable carelessness—and how a business that failed so miserably could still be rewarded with full payment.

Catastrophic Care by David Goldhill: 9780345802736 ...

Catastrophic Care is the eye-opening result. Blending personal anecdotes and extensive research, Goldhill presents us with cogent, biting analysis that challenges the basic preconceptions that have shaped our thinking for decades.

A visionary investigation that will change the way we think about health care: how and why it is failing, why expanding coverage will actually make things worse, and how our health care can be transformed into a transparent, affordable, successful system. In 2007, David Goldhill's father died from infections acquired in a hospital, one of more than two hundred thousand avoidable deaths per year caused by medical error. The bill was enormous—and Medicare paid it. These circumstances left Goldhill angry and determined to understand how world-class technology and personnel could coexist with such carelessness—and how a business that failed so miserably could be paid in full. Catastrophic Care is the eye-

opening result. Blending personal anecdotes and extensive research, Goldhill presents us with cogent, biting analysis that challenges the basic preconceptions that have shaped our thinking for decades. Contrasting the Island of health care with the Mainland of our economy, he demonstrates that high costs, excess medicine, terrible service, and medical error are the inevitable consequences of our insurance-based system. He explains why policy efforts to fix these problems have invariably produced perverse results, and how the new Affordable Care Act is more likely to deepen than to solve these issues. Goldhill steps outside the incremental and wonkish debates to question the conventional wisdom blinding us to more fundamental issues. He proposes a comprehensive new way, where the customer (the patient) is first—a system focused on health and maintaining it, a system strong and vibrant enough for our future. If you think health care is interesting only to institutes and politicians, think again: Catastrophic Care is surprising, engaging, and brimming with insights born of questions nobody has thought to ask. Above all it is a book of new ideas that can transform the way we understand a subject we often take for granted.

"A visionary investigation that will change the way we think about health care- how and why it is failing, why expanding coverage will actually make things worse, and how our health care can be transformed into a transparent, affordable, successful system. In 2007, David Goldhill's father died from infections acquired in a hospital, one of more than two hundred thousand avoidable deaths per year caused by medical error. The bill was enormous and Medicare paid it. These circumstances left Goldhill angry and determined to understand how world-class technology and personnel could coexist with such carelessness and how a business that failed so miserably could be paid in full. Catastrophic Care is the eye-opening result. Blending personal anecdotes and extensive research, Goldhill presents us with cogent, biting analysis that challenges the basic preconceptions that have shaped our thinking for decades. Contrasting the Island of health care with the Mainland of our economy, he demonstrates that high costs, excess medicine, terrible service, and medical error are the inevitable consequences of our insurance-based system. He explains why policy efforts to fix these problems have

The definitive story of American health care today—its causes, consequences, and confusions In March 2010, the Affordable Care Act was signed into law. It was the most extensive reform of America's health care system since at least the creation of Medicare in 1965, and maybe ever. The ACA was controversial and highly political, and the law faced legal challenges reaching all the way to the Supreme Court; it even precipitated a government shutdown. It was a signature piece of legislation for President Obama's first term, and also a ball and chain for his second. Ezekiel J. Emanuel, a professor of medical ethics and health policy at the University of Pennsylvania who also served as a special adviser to the White House on health care reform, has written a brilliant diagnostic explanation of why health care in America has become such a divisive social issue, how money and medicine have their own—quite distinct—American story, and why reform has bedeviled presidents of the left and right for more than one hundred years. Emanuel also explains exactly how the ACA reforms are reshaping the health care system now. He forecasts the future, identifying six mega trends in health that will determine the market for health care to 2020 and beyond. His predictions are bold, provocative, and uniquely well-informed. Health care—one of America's largest employment sectors, with an economy the size of the GDP of France—has never had a more comprehensive or authoritative interpreter.

Explains how employers can take control of the increasing burden of health care costs, using the approach taken by Serigraph, a company that focused on consumer responsibility, primary care, and centers of value, as a model for improving health care while lowering the cost.

A Vintage Shorts Original Selection Despite all attempts to make it otherwise, the American health care system remains arcane, bloated, inefficient, and damaging to our health. We pay high premiums, endure exorbitant out-of-pocket costs, see little to no information about treatment options, and suffer often meager and sloppy care. The Affordable Care Act was an unambitious reform not likely to have an impact on these fundamental problems. But, politics aside, health care doesn't have to be this complicated. And, its costs don't have to be this high. In this provocative and convincing essay, David Goldhill outlines the myriad misconceptions that plague American health care, and makes a radical case for reform. There is no panacea, but if we want to preserve our health and our pocketbooks, we need to normalize health care and enable a competitive, dynamic and diverse exchange where providers will be held accountable to the Americans they care for. An ebook short.

America's Health Care Crisis Solved highlights the major pitfalls of our current health care system and shows why, without changes, health care costs will soon demolish the American economy as well as the opportunity to receive quality care. However, contrary to the increasingly popular idea of a government health plan, the alternative presented by authors J. Patrick Rooney and Dan Perrin brings the self-interest of you, the American consumer, into the equation.

A renowned authority from Harvard Business School confronts America's health care crisis-and how consumer control can fix it PRAISE FOR WHO KILLED HEALTHCARE? "A brilliant analysis... A must-read." – Bill George, Professor, Harvard Business School and Former CEO of Medtronic "As it becomes more and more obvious to everyone that our current health care system is unsustainable, this is the book that had to be written." – Daniel H. Johnson, Jr. MD, former president of the American Medical Association "Regina Herzlinger's ideas to tackle the crisis of the U.S. health care system are based on keen knowledge of the system's existing difficulties along with insights that introduce the reader to new streamlined choices that have the potential of getting both quantity and cost under control." – Joseph Kennedy, founder, chairman, and president, Citizens Energy Corporation, CEO, Citizens Health Care, former representative (D-Mass) "Regina Herzlinger... offers a vision of the way things can be, should be, and will be sooner or later. The only question is: how long do we have to wait?" – Greg Scandlen, founder, Consumers for Health Choices "Regi Herzlinger has brilliantly articulated a better way – embracing the principles of competition and innovation that cause every other sector of our economy to thrive. Discharging American health care from the ICU can only happen by putting individual Americans – not politicians and bureaucrats – back in charge of their health care decisions." – U.S. Senator Tom Coburn (R-Okla), M.D. "Following on the heels of her landmark Market-Driven Health Care, Herzlinger lays it on the line with her expose of what many who work in the health care industry have felt in their gut. Now it is articulated in an entertaining and must-read

portrayal, with you and me as the only way out.” – Dennis White, executive vice president for strategic development, National Business Coalition on Health “A wonderful Orwellian romp through issues which carry a deadly irony. The killers of health care are, of course, the third parties, each of which has an itchy palm and a commitment to profit or power which exceeds the commitment to service, with each engaging the others within a politically shaped box. Rarely has the case for the public been made with so much force, foresight, and wit, and a better way forward shown so clearly.” – James F. Fries, MD, Professor of Medicine, Stanford University School of Medicine “You can practically hear the war chants as Professor Herzlinger sets out her view of what’s wrong with the health care system and how to fix it. You’d best read it so you can decide which side you will be on when the battle is joined.” – Paul Levy, CEO, Beth Israel Hospital, Boston, MA “Regina Herzlinger, the nation’s leading expert on consumer-driven health care, has given us a brilliant analysis of the flaws in our health care system and what it will take to get it back on track. Her latest book is a must-read.” – Bill George, Professor of Management Practice, Harvard Business School, Former CEO, Medtronic, and author of Authentic Leadership “You don’t have to agree with her diagnosis and prescription for the U.S. health care system, but you do have to read her book. Once again, Professor Herzlinger has put together a well researched, well written, and very provocative blueprint for the future of health care.” Peter L. Slavin, MD, President, Massachusetts General Hospital
