Hi, I'm Priscilla. I've created this blog to jot down my adventures and along the way help you decide where to go and what to do while on vacation. A little background information about myself: I was born and raised in Los Angeles and continue to live here. Once upon a time, I believed I didn't need to travel because LA had everything!

A little insight.. - Following the Milky way

Following the 1920 Great Debate between the astronomers Harlow Shapley and Heber Curtis, observations by Edwin Hubble showed that the Milky Way is just one of many galaxies. The Milky Way is a barred spiral galaxy with an estimated visible diameter between 170,000 and 200,000 light-years (ly).

Astronomers have known for some time that the Milky Way and the Andromeda galaxies will collide on some future date. The best guess for that rendezvous has been about 3.75 billion years from now. But now a new study based on Data Release 2 from the ESA's Gaia mission is bringing some clarity to this future collision.

Turns Out We Were Wrong About When Our Galaxy Will Collide ...

Due to government rules you are not permitted to visit with other households in groups of more than six people.Please ensure that you follow the rules for social distancing between groups. So for example, different households (if more than 6 people in total) need to sit seperately to watch our shows - we have spaces marked out to make this easy!
