An EPA investigator experiences a deadly premonition while fishing in Florida. A murder in Michigan causes a small toxic spill. EPA investigator, Derk Bryan, soon discovers that these two disparate events threaten every drop of water on the planet and every important relationship in his life. His laizze faire life on the beach is now on a collision course with the powerful chemical company magnate, Jack Von Lleuwan, and his bodyguard, an ex-wrestler with anger management issues. Von Lleuwan's newest product, PESTfree(c) designed to replace chemicals that are contaminating the food and water worldwide, contains a deadly flaw. As the body count grows, Derk Bryan races against the clock to thwart disaster. PEST is a fast paced fictional story but all of the facts are derived from public records. It paints an ominous picture of a society slowly being poisoned to death by special interests and a cooperative government. Since the release of PEST, a suit has been filed against a major grower in Florida and NC accusing it of being responsible for several children born with birth defects and the death of one child. North Carolina has issued the largest fine in history. Scientists employed by the State of Florida have resigned because the State coerced them to lie about their findings regarding the dangers of many pesticides used in Florida. A Canadian study indicated that the effect of pesticides and industrial toxins is so pervasive that 1 of 6 children is suffering substantially lower IQs as a result.

From the New York Times bestselling author of Looking for Mr. Goodbar—the story of two women, a psychoanalyst and her patient who help each other through very different periods in their lives. When Dawn Henley, the beautiful, talented Barnard College freshman steps into psychoanalyst Dr. Lulu Shinefeld's office, she's immediately intrigued. What could have driven this girl to such extreme levels of depression? Over the course of five years, Dawn's bizarre and tortured childhood is drawn out, and both women are inevitably changed.

Everything changes for 13-year-old Travis, a new student who is trying to hide his illiteracy, when he meets a sassy classmate with her own secrets and a remarkable teacher.

The Death and Life of Charlie St. Cloud tells the haunting story of a young man who narrowly survives a terrible car wreck that kills his little brother. Years later, the brothers' bond remains so strong that it transcends the normal boundaries separating life and death. Charlie St. Cloud lives in a snug New England fishing village. By day he tends the lawns and monuments of the ancient cemetery where his younger brother, Sam, is buried. Graced with an extraordinary gift after surviving the accident, he can still see, talk, and even play catch with Sam's spirit. But townsfolk whisper that Charlie has never recovered from his loss. Into his carefully ordered life comes Tess Carroll, a captivating, adventuresome woman training for a solo sailing trip around the globe. Fate steers her boat into a treacherous storm that blows her back to harbor, to a charged encounter with Charlie, and to a surprise more overwhelming than the violent sea itself. Charlie and Tess discover a beautiful and uncommon connection that leads to a race against time and a desperate choice between death and life, between the past and the future, between holding on and letting go. Luminous, soulful, and filled with unforgettable characters, The Death and Life of Charlie St. Cloud is one of those rare, wise books that reveal the mysteries of the unseen world around us, gently transforming the worst pain of loss into hope, healing, and even laughter. Suspenseful and deeply moving, its startling climax reminds us that sometimes tragedies can bring about miracles if we simply open our hearts.

The demonic ghost of a Russian aristocrat uses his magic violin to enchant the exquisite Triana and transport her to a terrifying realm where they join a battle of wills, in an evocative tale of seduction. Reprint.

A firsthand account of the swift transformation of Williamsburg, from factory backwater to artists' district to trendy hub and high-rise colony Williamsburg, Brooklyn, is now so synonymous with hipster culture and the very idea of urban revitalization—so well-known from Chicago to Cambodia as the playground for the game of ironized status-seeking and lifestyle one-upmanship—that it's easy to forget how just a few years ago it was a very different neighborhood: a spread of factories, mean streets and ratty apartments that the rest of New York City feared and everyone but artists with nowhere else to go left alone. Robert Anasi hasn't forgotten. He moved to a \$300-a-month apartment in Williamsburg in 1994, and watched as the area went through a series of surreal transformations: the warehouses became lofts, secret cocaine bars became stylized absinthe parlors, barrooms became stage sets for indie-rock careers and rents rose and rose—until the local

artists found that their ideal of personal creativity had served the aims of global commerce, and that their neighborhood now belonged to someone else. Tight, passionate, and provocative, *The Last Bohemia* is at once a celebration of the fever dream of bohemia, a lament for what Williamsburg has become and a cautionary tale about the lurching transformations of city neighborhoods throughout the United States.

Why can't we solve our problems anymore? Why do threats such as the Gulf oil spill, worldwide recession, terrorism, and global warming suddenly seem unstoppable? Are there limits to the kinds of problems humans can solve? Rebecca Costa confronts- and offers a solution to-these questions in her highly anticipated and game-changing book, *The Watchman's Rattle*. Costa pulls headline for today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities. With compelling evidenced based on research in the rise and fall of Mayan, Khmer, and Roman empires, Costa shows how t ht tendency to find a quick solutions- leads to frightening long term consequence: Society's ability to solve its most challenging, intractable problems becomes gridlocked, progress slows, and collapse ensues. A provocative new voice in the tradition of thought leaders Thomas Friedman, Jared Diamond and Malcolm Gladwell, Costa reveals how we can reverse the downward spiral. Part history, part social science, part biology, *The Watchman's Rattle* is sure to provoke, engage and incite change.

Bestiality and Zoophilia: Sexual Relations with Animals is a special issue of *Anthrozoös*, the journal of the International Society for Anthrozoology -- a multi-disciplinary journal of the interactions of people and animals.

This first English translation of the *Asokavadana* text, the Sanskrit version of the legend of King Asoka, first written in the second century A.D. Emperor of India during the third century B.C. and one of the most important rulers in the history of Buddhism. Asoka has hitherto been studied in the West primarily from his edicts and rock inscriptions in many parts of the Indian subcontinent. Through an extensive critical essay and a fluid translation, John Strong examines the importance of the Asoka of the legends for our overall understanding of Buddhism. Professor Strong contrasts the text with the Pali traditions about Kind Asoka and discusses the Buddhist view of kingship, the relationship of the state and the Buddhist community, the king s role in relating his kingdom to the person of the Buddha, and the connection between merit making, cosmology, and Buddhist doctrine. An appendix provides summaries of other stories about Asoka.
