The term Asia Pacific generally refers to a combination of East Asia, Southeast Asia, and islands in the Pacific Ocean - and most are also considered part of Australasia or Oceania. Asia contains the Indian subcontinent , Iranian Plateau , Arabian peninsula , as well as a piece of the North American plate in Siberia.

~~Geography of Asia - Wikipedia~~

Asia, the world's largest and most diverse continent. It occupies the eastern four-fifths of the giant Eurasian landmass. Asia is more a geographic term than a homogeneous continent, and the use of the term to describe such a vast area always carries the potential of obscuring the enormous diversity among the regions it encompasses.
