"Exciting and engaging vocabulary instruction can set students on the path to a lifelong fascination with words. This book provides a research-based framework and practical strategies for vocabulary development with children from the earliest grades through high school. The authors emphasize instruction that offers rich information about words and their uses and enhances students' language comprehension and production. Teachers are guided in selecting words for instruction; developing student-friendly explanations of new words; creating meaningful learning activities; and getting students involved in thinking about, using, and noticing new words both within and outside the classroom. Many concrete examples, sample classroom dialogues, and exercises for teachers bring the material to life. Helpful appendices include suggestions for trade books that help children enlarge their vocabulary and/or have fun with different aspects of words"--

With words and a contextual sentence on the front, and definitions, pronunciation, and syllable breaks on the back, our Sylvan flashcards make learning easy and fun. We've also included 10 blank cards kids can use for new or personalized vocabulary. Plus, it's easy to keep track of which words your child has learned with the color-coded meter on the side of this box. Once your child feels comfortable with a card, flip it upside down, move it to the back of the box behind the divider, and watch your child's vocabulary grow!

Many teachers in regular classrooms feel unprepared to teach students with learning disabilities. Fortunately, brain research has confirmed that strategies benefiting learners with special challenges are suited for engaging and stimulating all learners. In this book, neurologist and classroom teacher Judy Willis explains that we can best help students by putting in place strategies, accommodations, and interventions that provide developmentally and academically appropriate challenges to suit the needs, gifts, and goals of each student. Brain-Friendly Strategies for the Inclusion Classroom will help teachers \* Understand how the brain learns and the technologies that reveal this process. \* Implement strategies that are compatible with students' individual learning styles and honor their multiple intelligences. \* Improve the focus of students with attention disorders and help them gain the confidence and skills they need to develop goal-oriented behaviors. \* Create an enriching learning environment by incorporating student-centered activities, discovery and hands-on learning experiences, cross-curricular learning, and multisensory lessons. \* Implement strategic review, study, and test preparation strategies that will allow students to retain information and connect it with future learning. \* Build safe, supportive classroom communities and raise class awareness and empathy for students with learning disabilities. It's time for teachers to lower the barriers, not the bar. Using strategies that align with research on how people's brains function, teachers can engage all students as individuals and help them reach their maximum potential with joy and confidence.
