Credit Cards | HSBC Canada

Corporate purchasing cards (or procurement cards) are more like charge cards than credit cards. They allow commercial organisations to pay for their business to business purchases electronically....

What if you could look behind the headlines of the global economy to see how it really worked? Instead of listening to pundits, politicians, and protestors, you could see firsthand how everyone from migrant workers to central bank governors lived their lives. Then you could decide for yourself where the big trends were heading. Now you can. Connected: 24 Hours in the Global Economy isn't another polemic for or against globalization. Daniel Altman takes you on a whirlwind journey through more than a dozen cities, gathering points of view from moguls, ministers, and the men and women on the

street. At each stop, you'll hear how the world's workers played their parts in the events of a single day. Starting with their stories, related in their own words, you'll take on pressing questions in new ways: Can poor countries become rich too quickly? Can corruption ever be a good thing? Do companies need crises in order to stay competitive? What determines the global economic pecking order? Most important, you'll learn how the billions of decisions made by individuals can and do change the future. *Connected: 24 Hours in the Global Economy* is part travel guide, part owner's manual—an absorbing, accessible, and essential road map for every citizen of the global economy in the twenty-first century.

Cash and Dash: How ATMs and Computers Changed Banking uses the invention and development of the automated teller machine (ATM) to explain the birth and evolution of digital banking, from the 1960s to present day. It tackles head on the drivers of long-term innovation in retail banking with emphasis on the payment system. Using a novel approach to better understanding the industrial organization of financial markets, *Cash and Dash* contributes to a broader discussion around innovation and labour-saving devices. It explores attitudes to the patent system, formation of standards, organizational politics, the interaction between regulation and strategy, trust and domestication, maintenance versus disruption, and the huge undertakings needed to develop online real-time banking to customers.
