"Spotlight on CAE" is a comprehensive course carefully written to the new CAE exam specifications introduced in December 2008. It prepares adult and younger learners to excel in the revised exam. All four skills are developed within each of the sixteen units, and are supported by an overall skills-based examination syllabus.

Spotlight on Advanced is a comprehensive course that has been revised to be in line with the new Cambridge English exam specifications for January 2015. It prepares adults and younger learners to excel in the revised exam. An exciting new feature of this revised edition is the Ideas Generator. Test takers need to generate ideas to pass the Speaking and Writing papers of the exam. The Ideas Generator uses National Geographic videos to stimulate students' interest in common exam topics, help them build ideas about these topics and gather the language they need to effectively write or speak about them. After each video lesson students will have a bank of ideas, functional language and vocabulary tied to eight topics that commonly appear in the exam. One of the most difficult parts of the exam for students is the Speaking Test. The Speaking Test videos and worksheets will prepare students by getting them to engage with simulations of all four parts of the Speaking test.

Spotlight on CAE is a comprehensive course carefully written to the new CAE exam specifications introduced in December 2008. It prepares adult and younger learners to excel in the revised exam. All four skills are developed within each of the sixteen units, and are supported by an overall skills-based examination syllabus. Spotlight on CAE includes:

Spotlight on Modern Transformer Design introduces a novel approach to transformer design using artificial intelligence (AI) techniques in combination with finite element method (FEM). Today, AI is widely used for modeling nonlinear and large-scale systems, especially when explicit mathematical models are difficult to obtain or completely lacking. Moreover, AI is computationally efficient in solving hard optimization problems. Many numerical examples throughout the book illustrate the application of the techniques discussed to a variety of real-life transformer design problems, including: • problems relating to the prediction of no-load losses; • winding material selection; • transformer design optimisation; • and transformer selection. Spotlight on Modern Transformer Design is a valuable learning tool for advanced undergraduate and graduate students, as well as researchers and power engineering professionals working in electric utilities and industries, public authorities, and design offices.

Spotlight on FCE prepares students to be fully aware of how the exam works and how to be ready to pass it. It consolidates and builds on essential areas of grammar and vocabulary. It also develops the speaking, reading, writing and listening skills required to pass. Spotlight on FCE also works well with the new online preparation course My FCE, which offers over 40 hours of additional test preparation.

This festschrift in honor of Professor Budugur Lakshminarayana's 60th birthday-based on the proceedings of a symposium on Turbomachinery Fluid Dynamics and Heat Transfer held recently at The Pennsylvania State University, University Park-provides authoritative and conclusive research results as well as new insights into complex flow features found in the turbomachinery used for propulsion, power, and industrial applications. Explaining in detail compressors, heat transfer fields in turbines, computational fluid dynamics, and unsteady flows, Turbomachinery Fluid Dynamics and Heat Transfer covers: Mixing mechanisms, annulus wall boundary layers, and the flow field in transonic turbocompressors The numerical implementation of turbulence models in a computer code Secondary flows, film cooling, and thermal turbulence modeling The visualization method of modeling using liquid crystals Innovative techniques in the computational modeling of compressor and turbine flows measurement in unsteady flows as well as axial flows and compressor noise generation And much more Generously illustrated and containing key bibliographic citations, Turbomachinery Fluid Dynamics and Heat Transfer is an indispensable resource for mechanical, design, aerospace, marine, manufacturing, materials, industrial, and reliability engineers; and upper-level undergraduate and graduate students in these disciplines.

Complete CAE is a course for the 2008 updated CAE exam. Informed by the Cambridge Learner Corpus and providing a complete CAE exam paper specially prepared by Cambridge ESOL, it is the most authentic exam preparation course available. This topic-based course covers every part of the CAE exam in detail, ensuring that students are fully equipped to tackle each part of every paper. The Class Audio CDs contain all the audio for the Students' Book.

A snake is too greedy for his own good in this book and CD package illustrated by children's book legend Eric Carle and narrated by award-winning actor Stanley Tucci. In this classic picture book from Richard Buckley and Eric Carle that includes a CD with audio narration by Stanley Tucci, a greedy python eats every creature he comes across in the jungle. From a tiny mouse to an enormous elephant, the eaten animals befriend one another in the belly of the snake, where they team up and kick the inside of the python until he spits them out. This humorous tale about manners, respect, and friendship will delight readers—and listeners!

"Knowing the tools of social media is a must for successful marketing these days, but the real promise of social media is the way it can teach us a whole new way of doing business. Humanize takes the principles underlying social media's growth and applies them to the way we lead and manage our organizations"--Back cover.

Fourth edition of the best-selling Cambridge English: Advanced (CAE) course, updated to prepare for the 2015 revised exam.

Collocations are combinations of words which frequently appear together. Using them makes your English sound more natural. Presents and explains approximately 1,500 word combinations in typical contexts using tables, charts, short texts and dialogues.
